inserted Tools

- Face Milling Cutters
- U - Drills
- Combination Boring Bars
- Anti Vibration Boring Bars
- Integrated Boring Bars
- Special Cartridges

- Back Boring Bars
- Special Light Weight
Two Piece Boring Bar
With Aluminum Body
- Micro Boring Bars

TURNKEY SOLUTIONS

Uttam Tools provides the total solutions in process engineering which consists of Fixture designing, tool engineering and component proving. Our project engineering team committed for innovative solution to achieve most competitive cost per component.

► ENQUIRY

We treat every RFQ as an opportunity to explore our innovation, expertise and skills. We are committed to ensure better profitability for customers with end to end responsibility .

► EXECUTION PROCESS

A comprehensive functional solution using world class engineering principals and standards.

- In-house Design, Engineering, Manufacturing & Documentation.
- Work flow oriented solutions based on realistic production target and to meet current and future needs of the customer.
- Professional project management to execute the project as per committed schedule and within the budget.
- Selection of the right vendors based on the expertise and specialty for all the bought out items.
- Checking, debugging & testing prior to dispatch on dedicated machines and testing equipments.

► SERVICE

A collaborative and client focused approach in order to ensure the performance of the process designed and executed by our team .

- Training to the process engineer, machine operator and programmer.
- Detail documentation with library of design and drawings.
- Correction, modification and development of the process to meet the present and future needs of the client.
- Cost effective conversion of the existing tools in case of the change in process.
- Pan-India sales and application support from regional offices.
